Public Notification Certifications
Do Not Use The Water – October 22, 2019; October 23, 2019;
October 24, 2019 and October 25, 2019**

Dear Ms. Diehl:

On behalf of Neville Township, transmitted herewith are the Public Notification (PN) Certifications for the “Do Not Use Water”, “Do Not Drink” and “Problem Corrected” notices.

During routine meter reading post-processing on October 22, 2019 for an industrial user located at 2895 Grand Avenue, Pittsburgh, Pennsylvania, 15225 (Watson Standard), Township Staff observed a metered backflow of approximately 2,000 gallons. Upon review of the service, the backflow was observed to directly connect to the fire suppression system which included a direct connection of a fire suppression foam comprised of National Foam Universal Gold 3% (copy of the MSDS sheet is provide as Attachment A). A double check detector was observed for this service and reported by the property owner to have been tested as recent as July 2019. Subsequently, the water service was closed (valved off) from the public water system on October 22, 2019.

The Pennsylvania Department of Environmental Protection (PaDEP) was notified of the situation and a “Do Not Use The Water” notice was issued on October 22, 2019. Copy of this notice and the PN Certification form are transmitted herewith as Attachment B. The following methods of public notice were utilized:

1. Door to door notification
2. Reverse 911 system
3. Media alert through the Allegheny County Emergency Services

4. Telephone call to special needs residents and critical facilities
5. Posting on the Township website

Emergency sampling was completed by PaDEP on October 23, 2019. In addition, as requested in consultation with PaDEP, poly- and perfluoroalkyl substances (PFAS) sampling was also completed on October 23, 2019. After consultation with the Township and PaDEP, the "Do Not Use The Water" notice was revised to a "Do Not Drink The Water" notice. Copy of this notice and the PN Certification form are transmitted herewith as Attachment C.

On October 25, 2019, results of the PFAS sampling were reviewed and in consultation with PaDEP, the "Do Not Drink The Water" notice was revised to a "Problem Corrected" notice. Copy of this notice and the PN Certification form are transmitted herewith as Attachment D. Copy of the PFAS sampling results are transmitted herewith as Attachment E. These were also submitted to email to PaDEP on October 25, 2019 upon receipt.

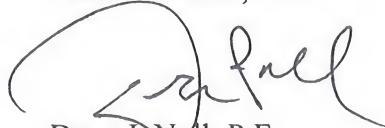

At this writing, the fire suppression service in question remains closed (valved off) from the public water system. The property owner was placed on notice and advised that removal and replacement of the existing double check with a Reduced Pressure Zone Device (RPZD) is required to reinstate the service.

Should you have any questions, please call.

Sincerely,

Ned Mitrovich, P.E.

As a customer of the Township of Neville, you were notified on October 22, 2019 and October 23, 2019 of a problem with our drinking water and were advised on October 23, 2019 to “Do Not Drink the Water”. This was the result of a metered backflow into the water distribution system from an industrial fire suppression system that included a fire fighting foam system.

We are pleased to report that the water quality testing conducted by the Township and by the Pennsylvania Department of Environmental Protection has found that the your drinking water meets US EPA safe drinking water standards as well as US EPA health advisory levels for the components of the fire fighting foam which may have entered the system. **The problem has been corrected and the “Do Not Drink the Water” notice/restriction has been removed for all customers.**

We apologize for any inconvenience and thank you for your patience.

As always, you may contact: Neville Township

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	mL	milliliter(s)
C	degrees Celsius	MPN	Most Probable Number
cfu	colony forming units	N.D.	non-detect
CP Units	cobalt-chloroplatinate units	ng	nanogram(s)
F	degrees Fahrenheit	NTU	nephelometric turbidity units
g	gram(s)	pg/L	picogram/liter
IU	International Units	RL	Reporting Limit
kg	kilogram(s)	TNTC	Too Numerous To Count
L	liter(s)	µg	microgram(s)
lb.	pound(s)	µL	microliter(s)
m3	cubic meter(s)	umhos/cm	micromhos/cm
meq	milliequivalents	MCL	Maximum Contamination Limit
mg	milligram(s)		
<	less than		
>	greater than		
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.		
ppb	parts per billion		
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.		

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" are not performed within 15 minutes.
